西方经济学

(1) M10, M11; S3.2, S4.¹

(2) 中国人民银行, FED, FED Balance Sheet Trends.

(3) 其他资料: [GM]

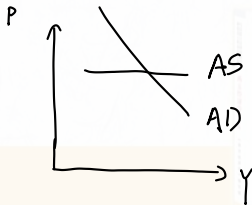

- INTRODUCTION TO ECONOMIC FLUCTUATIONS
- AGGREGATE DEMAND I: BUILDING THE IS-LM MODEL
- AGGREGATE DEMAND II: APPLYING THE IS-LM MODEL

¹M 指代马工程教材, S 指代课外阅读材料沈坤荣教程。

西方经济学

- (1) 掌握凯恩斯主义分析框架：Keynesian Cross, IS-LM.
- (2) 领会马工程教材精神。

Outline

1 The Goods Market

- Keynesian Cross
- Saving-Investment Framework
- The IS Relation

2 The Financial Market

- Equilibrium in the Financial Market
- The LM Relation

3 The IS-LM Model

- IS-LM
- Fiscal Expansion
- Monetary Expansion

4 The Aggregate Demand Relation

- The Basic AS-AD Model

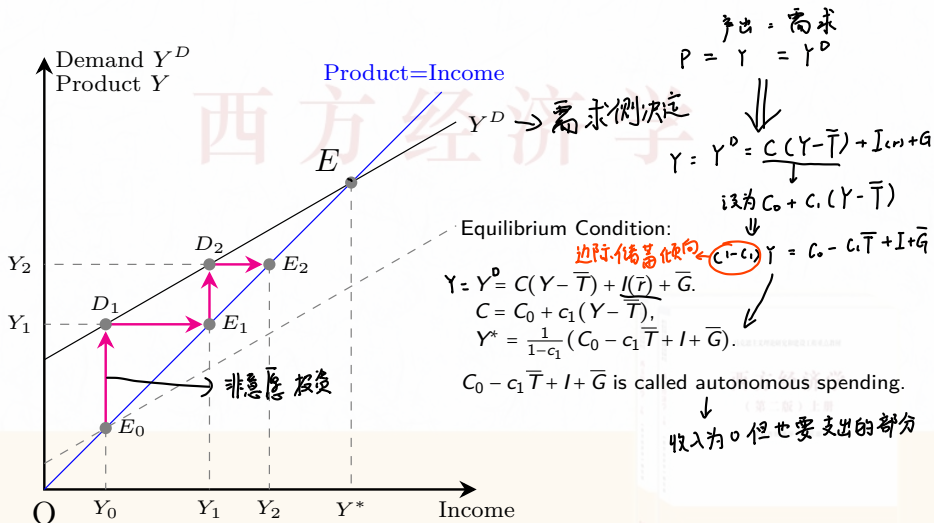

5 马工程教材疑难重点

Equilibrium in the Goods Market: The Keynesian Cross

Saving-Investment Framework: $S = I$

$$Y - Y_D = I_u$$

$$Y = [C(Y - \bar{T}) + I(\bar{r}) + \bar{G}] + I_u$$

$$S = Y - C - \bar{G} = I(\bar{r}) + I_u$$

$S = I(\bar{r}) + I_u$ $I_u \neq 0$ 时, 调整到均衡
时, $I_u = 0$, 停止.

where $I(\bar{r})$ is the desired investment, I_u is the unplanned inventory investment, and $I + I_u$ is the ex post investment. It implies the saving is always equal to the ex post investment (by means of adjustments of inventory investment). In equilibrium, $I_u = 0$ and $S = I(\bar{r})$.

$$\frac{\partial S}{\partial Y} = c(1 - c')$$

I_u 可以视为不得不进行的存货投资

Equilibrium Conditions in the Goods Market

西方经济学

Proposition 1 (Equivalent Equilibrium Conditions in the Goods Market)

- (1) *The product is equal to the aggregate demand, $Y = Y^D$.*
- (2) *The **unplanned** inventory investment is zero, $I_u = 0$.*
- (3) *The saving is equal to the desired investment, $S = I(\bar{r})$.*

The IS Relation

$$Y^D = c(Y - \bar{T}) + I + G, \quad I \text{ 改变, 截距改变, 仅此而已.}$$

i 上升, 投资下降, Y 下降

Outline

1 The Goods Market

- Keynesian Cross
- Saving-Investment Framework
- The IS Relation

2 The Financial Market

- Equilibrium in the Financial Market
- The LM Relation

3 The IS-LM Model

- IS-LM
- Fiscal Expansion
- Monetary Expansion

4 The Aggregate Demand Relation

- The Basic AS-AD Model

Equilibrium in the Financial Market

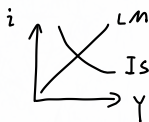

Nominal Interest Rate

The *theory of liquidity preference* implies the demand for real money balances can be written as

$$\frac{M^d}{P} = L(Y, i).$$

Suppose that (1) P is given; (2) The supply of money, M^S , is exogenously controlled by the central bank.

对 i 求导.

$$0 = \frac{\partial L}{\partial Y} \cdot \frac{\partial Y}{\partial i} + \frac{\partial L}{\partial i}$$

$$\frac{\partial Y}{\partial i} > 0$$

Hypothesis 1 (Liquidity Trap)

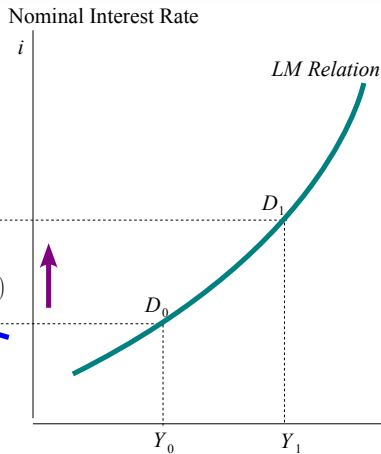

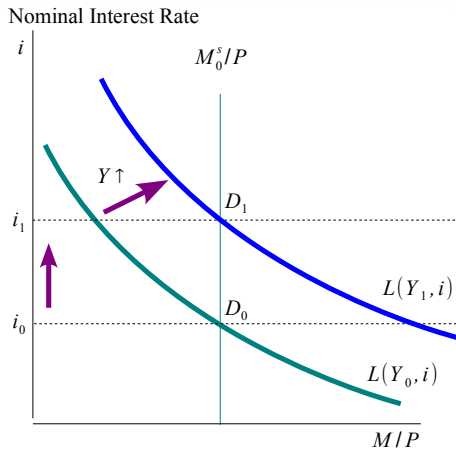

$$\lim_{i \rightarrow 0} L(Y, i) = -\infty. \Rightarrow \text{任意数量}$$

$$\lim_{i \rightarrow 0} L(Y, i) = -\infty$$

高等教育出版社
高等教育电子音像出版社

$i=0$. Y 任意值

Outline

Fiscal Expansion

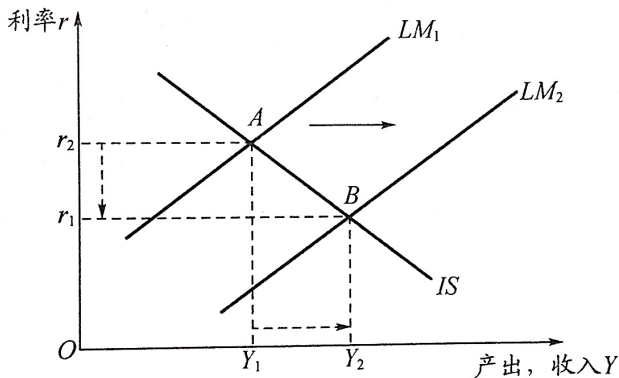

扩张性财政政策将使 IS 曲线向右平移。结合货币市场的影响, 这将使得均衡产出从 Y_1 增加到 Y_3 , 而均衡利率从 r_1 上升到 r_2 。

图 4-15 $IS-LM$ 模型中的财政政策效应

高等教育出版社
高等教育电子音像出版社

Monetary Expansion

扩张性货币政策使均衡利率下降的同时,刺激了私人投资的增加,从而均衡产出获得增加。

图 4-18 扩张性货币政策的效应

Outline

高等教育电子音像出版社

疑难重点

西方经济学

- (1) 如何从 Keynesian cross 推出 IS relation?
- (2) 如何从金融市场均衡推出 LM relation?
- (3) 如何从 IS-LM 框架推出 AD relation?
- (4) 什么是流动性陷阱?
- (5) 掌握 IS-LM 模型, 并在此框架内分析政策的效应。

马工程教材疑难重点

1 (E2, p.66)

根据马工程教材观点, 应当如何评析西方经济学的均衡国民收入决定原理?

2 (E2, p.71)

根据马工程教材观点, 应当如何评析西方经济学的投资需求决定理论?

3 (E2, p.101)

根据马工程教材观点, 应当如何评析西方经济学的 IS-LM 模型?
